Technical Stack & Tools: Pendo • Jira • Confluence • Figma • Power BI • Databricks

WORK EXPERIENCE

ADP | Senior Product Manager | Aug 2024 – Present

ADP DataCloud: AI Analytics Platform (B2B SaaS)

- Led product strategy and roadmap for an **AI-powered Analytics platform** within a \$75M portfolio and 1M+ users supporting data intelligence workflows.
- Partnered with Microsoft to launch an ADP-Power BI certified connector, enabling data interoperability and 30% adoption among analytics clients.
- Launched an **AI-driven analytics chat assistant**, simplifying insights discovery and increasing utilization by **25% across 50k+ clients**.
- Identified activation gap and designed a **product-led growth** funnel with trials, nudges, and engagement flows generating **\$1M incremental revenue**.
- Identified CFO visibility gaps in cost spend and launched an operations cost and planning tool, increasing the **adoption by 25%** to finance professionals.
- Established strategic integration partnership to incorporate external market benchmarking data into ADP analytics, improving **CSAT scores to 4.5+**.
- Recipient of the **“Rising Star PM Award”** at ADP Product Organization for driving analytics-led product adoption and platform innovation.

ADP PayDirect Deposits: Payments Platform (B2C, fintech) integrated with banks and fintech

- Led product initiatives for a direct deposit platform supporting **10K+ daily transactions** across U.S. banking and fintech partner ecosystems.
- Collaborated with engineering teams to redesign payment APIs and partner integration workflows, reducing **transaction latency by 50%**.
- Worked with data science team to launch an **ML-based fraud detection** feature for transaction monitoring, reducing fraudulent deposit incidents by 15%.
- Optimized deposit onboarding funnel using cohort and funnel analysis, reducing user drop-offs by 5% and increasing **completion rates by 10%**.

Fair Deal Associates | Product Specialist | Nov 2020 – May 2022

- Owned SaaS **digital product transformation** across CRM, analytics, and order to cash workflow systems, improving customer satisfaction by 30%.
- Designed and shipped CRM automation covering dealer onboarding, invoicing, and shipment tracking, **improving NPS by 15 points**.
- Built product analytics dashboards in Power BI and Excel to monitor revenue, turnover, and dealer performance, **saving 12+ hours per cycle**

Accenture | Associate Software Engineer | July 2019 – Oct 2020

- Designed & implemented **Salesforce**-based workflow automation for a Fortune 500 client, reducing service request resolution time by 30%.
- Developed Salesforce automation tools and workflows, cutting **transaction clicks by 75%** and accelerating service resolution time for 500+ users.
- Collaborated with cross-functional teams across engineering, product, and business to deliver enterprise workflow improvements.

PROJECTS

AI Operations Intelligence Assistant | Python · LangChain · GPT-4 · Streamlit | 2026

- Built and deployed a conversational analytics dashboard enabling operations leaders to query live KPI data in plain English, replacing manual CSV reporting.
- Prototyped and deployed a full-stack AI MVP — data layer, LLM agent, and dashboard UX — independently from zero to live product.
- Designed KPI metric cards and chat interface surfacing real-time SLA breach rates, cost anomalies, and regional performance breakdowns.
- Live demo: <https://github.com/arshinmahajan/ai-ops-intelligence-assistant>

Taxilla IT Solutions Pvt Ltd. | Product Management Internship | April 2023 – June 2023

- Defined MVP and product requirements for e-invoicing solution targeting \$6.6B procurement market, enabling 75% cost savings through automation.
- Shipped product via rapid prototyping, expanding e-delivery across **5 countries in Europe** and validating early enterprise adoption.
